

ON SITE SUMMER SERVICE

Let Track Inc. and our trained and certified mechanics handle your Tucker Sno-Cat® maintenance needs. With our On Site Service Program we will travel to your shop location and fully service your machine using OEM parts and filters. We will also perform system operational checks and component inspections to repair small problems before they become large component failures in the field.

On Site Service highlights include but are not limited to:

- Full vehicle inspection with customer report
- Oil bath wheel inspection
- Air filter replacement
- Engine oil change
- Replacement of fuel filters
- Transmission oil change, external filter only (2500 series); internal filter on AT545
- Differential oil changed with gear inspection and bearing cap torque check
- Transfer case service
- Hydraulic oil & filters replaced
- Hydraulic system pressures
- Full inspection of carrier components
- Inspection of carrier alignment to extend service life of wheels and sprockets
- Pressure check and test of coolant system
- Inspection of steering components and trunion areas
- Full inspection of hydraulic hoses and components
- Grease and inspect chassis
- Vehicle alignment and steering adjustments
- Check lights and vehicle functional checks
